

The Power of Partnership: Springboard and Imagine Schools

"Springboard's curriculum offers much more than the typical after-school program curriculum and centers on a well-balanced approach to learning that includes the arts, social skills and extra-curricular activities aligned to children's interests."

~ Andria McMichael, Ed.D.,
Regional Director,
Imagine Schools

Springboard:

Customizes our programs to support each school's mission and vision and the community.

Collaborates with each school to reinforce academic and behavioral objectives.

Employs certified teachers to ensure we realize these goals.

Customized Partnership Drives Academic Achievement

Springboard has served three Maryland Imagine Schools for over six years, partnering to provide extended-day programs for approximately 330 Imagine Schools' students. Imagine Schools operates 75 public charter schools in 12 states and the District of Columbia. As a highly supportive and collaborative partner, Springboard's certified teachers guide children's homework completion and comprehension in partnership with Imagine Schools' school-day teachers, build interest in books and reading, help evolve social-emotional skills and deliver an award-winning physical education program directly linked to academic benefits. Our solid partnership with each school means we enthusiastically support and sponsor school and community events, such as the Diabetes Walk and annual Back to School Fair. Our local teams' participation in the Imagine Schools' Regional Conferences drives alignment with Imagine Schools' teaching and learning objectives and ensures our programs reinforce school goals.
